

## DESIGN A POSTER USING ITEMS FROM THE RECYCLING BIN

Amir was inspired to create a poster using waste materials from his recycling bin to promote environmental change at a Climate Change Action forum.

Amir regularly picks up discarded rubbish from his local beach. He decides to use his beach finds to highlight the problems with plastic pollution in our oceans.

### INSTRUCTIONS

Use your imagination and create something new from something old!

It could be for an environment rally, to advertise a garage sale or as a call to action.

The recycling bin is the perfect place to find materials to use.

Think about how you can make your poster stand out in a crowd and use the poster plan to get started.

### POSTER PLAN:

What is the main theme or topic for your poster?

---

---

---

What is your slogan?

---

---

Sketch out your idea below...

### AMIR'S TIPS:

Cut open a large cereal box to use as the base for the poster. Sticks from the garden can be used to reinforce the back of the poster. Masking tape is great as you can paint or draw over it.

### FROM THE RECYCLING BIN:

- Old netting from orange bags
- Bottle tops for colour
- Aluminium foil for some bling
- Bottles and small boxes to add a 3D element to your poster
- Cut up egg cartoons for texture
