

# Safety sign for your frog-friendly habitat

Design a sign about how to stay safe around the pond.  
Use words, infographics or a combination of both.

## Consider the following when creating your pond safety sign:

- Who is the target audience for the safety sign? This will influence the language you use and the use of infographics
- What important message are you wanting to communicate?
- Where will you display the safety sign?
- How will you protect your sign from weather elements such as rain or sun?

**DANGER**  
Unfenced Pond

**NO**  
Unaccompanied Children
