

## Sign for your Junior Landcare bee-friendly habitat

Design a sign to describe your bee habitat and encourage people to care for the habitat and the bees that live there.

Use words, infographics (informative diagram) or a combination of both.

### Consider the following when creating your bee habitat sign:

- Who will be looking at the sign? This will influence the language you use and the use of infographics.
- What important message are you wanting to communicate?
- How will you encourage people to look after the bee hotel and the surrounding environment?
- Where will you display the sign?
- How will you protect your sign from weather elements such as rain or sun?
